Subscribe. Book World. The 10 best books of 2015. By Book World Reviewers | Illustrations by Julia Rothman. Nov. 18, 2015. In our annual roundup of best books, you'll find 10 that we think are exceptionally rewarding and 100 more you shouldn't miss. Jon Meacham's new biography of George H.W. Bush accomplishes a neat trick. It completes the historical and popular rehabilitation of its subject, though it does by affirming, not upending, common perceptions of America's 41st president. In Meacham's telling, Bush indeed lacked an ideological vision, was as overmatched in domestic policy as he was masterful on the global stage, benefited from his family's influence, and remains overshadowed by the myth of his predecessor and the drama of his sons' political lives. The year's best books, selected by the editors of The New York Times Book Review. Translated by Ann Goldstein. Like the three books that precede it in Ferrante's Neapolitan quartet, this brilliant conclusion offers a clamorous, headlong exploration of female friendship set against a backdrop of poverty, ambition, violence and political struggle. As Elena and Lila, the girlhood rivals whose relationship spans the series, enter the middle terrain of marriage and motherhood, Ferrante's preoccupations remain with the inherent radicalism of modern female identity — especially, and strikingly, with the struggles of the female artist against her biological and social destiny.
