I ask only once a year: please help the Internet Archive today. Right now, we have a 2-to-1 Matching Gift Campaign, so you can triple your impact! Most can't afford to give, but we hope you can. The average donation is \$45. If everyone reading this chips in just \$5, we can end this fundraiser today. All we need is the price of a paperback book to sustain a non-profit website the whole world depends on. We have only 150 staff but run one of the world's top websites. We're dedicated to reader privacy so we never track you. A second course in complex analysis. William A. Veech. 1967. Come with us to read a new book that is coming recently. Yeah, this is a new coming book that many people really want to read will you be one of them? Of course, you should be. It will not make you! (More). William A. Veech. Publisher: Dover Publications.] This is a very careful treatment of several topics in complex analysis. It covers all the details in the proofs and doesn't do any hand-waving over the tricky parts, It's not in a hurry to get anywhere, and takes a number of digressions. This new Dover edition is a slightly-corrected version of the 1967 work published by W. A. Benjamin. The first half of the book has a strong geometrical flavor, dealing with analytic continuation, the Riemann mapping theorem, the Koebe uniformization theorem, and the Koebe-Faber distortion theorem.
