CODATA Key Values For Thermodynamics

J. D Cox V. A Medvedev Donald D Wagman

The Committee on Data for Science and Technology (CODATA) has conducted a project to establish internationally agreed values for the thermodynamic properties of key chemical substances. This table presents the final results of the project.
The section entitled Observation Deck features a data chart showing all environmental measurements displayed by the Earth Observatory and for which months data are available. Further sections include Laboratory (hurricane research), Study (where scientists report from the field), Library (includes links to data sets), and Newsroom, among others.
