## Sacred Geometry: Philosophy and Practice

By Robert Lawlor

Thames & Hudson. Paperback. Book Condition: New. Paperback. 112 pages. Dimensions: 10.7in. x 7.8in. x 0.3in. An introduction to the geometry which, as modern science now confirms, underlies the structure of the universe. The thinkers of ancient Egypt, Greece and India recognized that numbers governed much of what they saw in their world and hence provided an approach to its divine creator. Robert Lawlor sets out the system that determines the dimension and the form of both man-made and natural structures, from Gothic cathedrals to flowers, from music to the human body. By also involving the reader in practical experiments, he leads with ease from simple principles to a grasp of the logarithmic spiral, the Golden Proportion, the squaring of the circle and other ubiquitous ratios and proportions. Art and Imagination: These large-format, gloriously-illustrated paperbacks cover Eastern and Western religion and philosophy, including myth and magic, alchemy and astrology. The distinguished authors bring a wealth of knowledge, visionary thinking and accessible writing to each intriguing subject. 202 illustrations and diagrams, 56 in two colors. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

### Reviews

*Completely among the finest pdf I actually have ever read through. it was actually writtern extremely completely and beneficial. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- Santos Metz

*Certainly, this is the finest work by any article writer. It really is full of wisdom and knowledge You will not sense monotony at at any time of your own time (that's what catalogs are for concerning should you ask me).*

-- Marion Mann DDS

Sacred Geometry was a text for the New Chartres School sponsored by Wisdom University in Chartres, France July 3-9. The book illuminated most of the geometrically related information which we experienced hands-on in our class with Richard Henry, British Geometrist. Richard led in making multi-dimensional shapes from point to dodecahedron and beyond! Lots of practical exercises and great pictures. So many things clearly explained all in one reasonably priced volume. Perfect if you are a Waldorf teacher for digging into the Seventh Grade geometry block or High School Sacred Geometry. Highly recommended! [Read more.](#)
