At the same time, however, we remain true to our original goals in writing this book: to provide our readers, with a text that effectively applies educational psychology to the real world. The implications of educational psychology has learning and teaching remain the core of our text. The subtitle "Windows on Classrooms" refers to our active portrayal of classroom scenarios, which continue to be essential. We liberally use case studies and vignettes taken from actual classrooms to make the content of the text concrete and understandable. This practice is grounded in learning theory and is consistent with the latest learning and motivation research. We introduce each chapter with a detailed classroom case to provide an applied framework for the chapter content. Frequent references to the case, including specific portions of dialogue, illustrate chapter topics and emphasize application in classroom settings. In this way, our case studies-both written and video-are integrated with each chapter presented. 728 pp. Englisch.
