Acknowledgments	xix
Introduction	xxi
What This Book Is About	xxii
What This Book Includes	xxii
A "Genre Agnostic" Approach	xxiii
So What Are You Waiting For?	xxiv
I Introduction to Level Design	1
Game Design	2
Level Designers	3
Anatomy of Level Design	4
Art	4
Design	5
Engineering	5
Defining Levels	6
Brief History of Levels	7
Creating Pinball—The Mother of Level Design	7
From Pinball Machines to Super Computers	8
In the Beginning There Was <i>Space War</i>	8
The Rise of Home Computing	9
Level Design Today	9
Overcoming Memory Constraints	10
Narrative Chapters	11
Dividing the Workload	11
Summary	12
	<b>vii</b>

Interview with Richard "Levelord" Gray of Ritual Entertainment	12
<b>2 Building a Simple Level</b>	<b>15</b>
Level Design Building Blocks	16
What About Story?	18
Putting It All Together	18
Concept	18
Environment	19
Beginning	19
Ending	20
Goal	20
Challenge	21
Determining the Challenge Mechanics	22
Reward	26
Failure	26
Summary	26
<b>3 Team Roles and the Pipeline</b>	<b>29</b>
Development Teams	30
Management	31
Producers	31
Project Managers and Assistant Producers	31
Creative Director	31
Leads	32
Design	32
Game Designers	33
Level Designers	33
Systems Designers	33
Art	34
Modelers	34
Animators	34

Texture Artists	35
Special Effects Artists	35
Interface Artists	35
Concept Artists	36
Programming	36
Gameplay Programmers	37
Tools Programmers	37
Graphics Programmers	37
Audio	38
Sound Designers	38
Composers	39
Other Development Roles	39
Cutscene Artists	39
Writers	39
Testers	40
Team Setup	40
Small Teams	41
Mid-Sized Teams	41
Large Teams	42
The Pipeline	44
The Unarguable Benefits of a Solid Pipeline	45
Pipeline and Technology	46
The Game Engine	47
The Game Editor	47
Pipeline as Defined by the Team	48
Summary	48
Interview with Hayden Wilkinson of KnowWonder Digital Mediaworks	48
Basic Level Design Theory	55
What Makes the Level Fun	57
Player Ergonomics—No Learning by Death	59
Allow Players to Save and Reload	60

## Contents

Give Clues	61
Be Aware of the Player's Comfort Level	61
Level Flow—Keep the Player Moving	62
Dissonance and the Importance of Believability	62
The Constant Danger of Boredom	64
Rhythm—Create a Roller Coaster Rather Than a Highway	67
Aesthetic Rhythm	69
Difficulty—Let the Player Win, Not the Designer	71
Dynamic Difficulty Adjustment	74
Wow Factor—The Water Cooler Moments	74
Hooks—Setting Your Level Apart	76
Summary	77
Interview with Dream Smith of Griptonite Games	78
5 Refining the Player Experience	83
Creating a Level Abstract	84
What Happens Now?	86
Connectivity and Defining the Boundaries	86
The Big Picture	86
Flow Versus Freedom	87
Different Flow Models	87
Gameplay Narrative	93
Ingredients	94
Designing Ingredients	95
Physics as Ingredients	96
Encounters	98
Challenging the Player's Game Knowledge	99
Creating Tension	100
Foreshadowing	100
Lighting	101
Paradigm Shifts	101

Music and Sound	102
Risks and Rewards	103
Rewards in General	103
Scripted Gameplay	104
Using Artificial Intelligence	105
States of Being	105
Decisions, Input and Output	106
Pathing and Patrols	107
Level Gestalt	109
Summary	109
Interview with Harvey Smith	110
<b>6 Common Level Design Limitations</b>	<b>121</b>
Technical Limitations	122
Memory	123
Processing Power and Frame Rate	124
Level Performance	124
Polycount and Performance	125
Level Lighting	127
Artificial Intelligence	128
Media Format	134
Target and Minimum Specs	135
Environmental Limitations	136
Locations	137
Environmental Settings	137
Creating a Reference File	139
A Final Word: Constraints in Licensed Games	139
Summary	139
<b>7 Designing and Documenting the Level</b>	<b>141</b>
Game Metrics	142

Different Metrics for Different Games	144
Powerups and Temporary Modifiers	144
User-Definable Metrics	145
Permanent Modifiers: Upgrades, Equipment, and Environmental Aids	146
Generating Gameplay—Brainstorming and Loose-Leaf Ideas	146
The Cell Diagram	148
War Rooms	149
Creating a Paper Design	150
Getting Started	151
Adding Details to the Level Draft	151
Choosing Your Design Environment	160
Supporting Documents	160
The Asset List	160
The Walkthrough	161
Conceptualizing Your Level with Visuals	162
Reviews and Revisions	163
Getting the Sign-Off	165
Summary	165
Interview with Ian Fischer of Ensemble Studios	166
8 Using a Level Editor: Building a 3D Space in UnrealEd	171
Installing and Opening the Editor	172
Starting a New Map	173
Undo and Redo	175
Viewing the Level in UnrealEd	175
Moving and Working in Three Dimensions	177
Camera Movement Controls in the Editor	177
3D View	178
Top, Front, or Side Views	178
Working with Level Geometry	178
Different Geometry Types in UnrealEd	179
BSP	179

Static Mesh	181
Terrain	182
Building the Level Hull in BSP	183
What Is a Brush?	183
What Is the Builder Brush?	185
Creating a Builder Brush	185
Placing Actors	187
The PlayerStart Actor	188
Adding Lights	190
Testing the Level	192
Loading Textures	193
Units of Measurement	195
Apply the Texture to the Level	196
Moving Actors in the Level	197
Moving Actors in the 3D View	198
Moving Actors in the 2D View	198
Adding a Static Mesh Actor	198
Changing the Build Parameters	200
Adjusting and Duplicating BSP	201
A Final Word on Grids, Snapping, and Clean Geometry	204
Summary	205
<b>Building the Level Part 1: Basic Building Techniques</b>	<b>207</b>
Restrain Yourself	209
The Difference Between 2D and 3D Levels	209
The Whitebox Process	210
Whiteboxing the Level Hull	212
Scale	213
Scale Problems in Third-Person Titles	213
Volume	216
Quality	217
Popular Level Building Approaches	223

Building Your Level in Sections	223
Building in Layers	225
Customizing Your Building Process	227
Optimization Techniques	227
Zones and Portals	228
Occlusion Objects	230
Spawners	232
Test Your Work Constantly	233
Summary	234
An Interview with Lee Perry of Epic Games	235
10 Building the Level Part 2: Visual Design	239
In a Fight Between Graphics and Gameplay...	240
Structure and Beauty, Perfect Together	241
The Style Guide	242
Texturing	243
Textures, Shaders, and Materials	244
Applying Your Textures Correctly	245
Using Photos as Textures	246
Tiling and Nontiling Textures	247
The Dangers of Stretching Your Textures (and Your Relationship with the Artists Who Made Them)	249
Breaking Up Geometry to Support Texturing	250
Keeping Your Texturing Consistent	250
Colors Within Textures	251
Lighting	252
How Light Works	252
RGB Versus RYB	253
Game Lighting	253
Level Lighting	253
Lighting Parameters in Games	256

	Common Light Types	258
	Level Lighting Techniques	262
	Lighting in Multiplayer Levels	268
	Common Lighting Mistakes	269
	Placing Props	271
	Additional Visual Elements	272
	Summary	277
	Interview with Mathieu Be"rube of Ubisoft Entertainment, Inc.	277
11	Building the Level Part 3: Theme, Investment, and Atmosphere	281
	Dissonance Strikes Back	282
	The Elements of a Great-Feeling Level	284
	Theme	284
	Style	284
	Natural Elements	285
	Sound and Music	285
	Character Accents and Costume	286
/	Lighting	286
	Puzzle Components	287
	AI Behavior	287
	Weapons and Items	288
	Player Investment—Believability and Consistency	288
	Provide Real-Life Services	289
	Give Your NPCs Life Beyond Their Purpose	289
	Don't Mistake Realism for Immersion	290
	Atmosphere	293
	Letting the Player's Imagination Do the Work	293
	Atmospheric Audio	298
	Summary	298
	An Interview with Rich Carlson of Digital Eel	299

12	A Case Study: The CIA Level from <i>Tom Clancy's Splinter Cell</i>	<b>305</b>
	An Introduction to <i>Splinter Cell</i>	306
	The Team	307
	The Pipeline	307
	Creating the Level Design Structure	307
	Mission 2.1—The CIA	308
	Assembling Reference	312
	The Design Process	315
	Building the CIA from Scratch	318
	The Danger of Unknown Metrics	320
	Shifting Technical Limitations	320
	Reducing the Scope	321
	Cutting Back on Content	321
	Resuming Production	323
	Cleaning Up	324
	Scripting	325
	Tuning	327
	Adjusting the Difficulty	327
	Wrapping Up	328
	Summary	328
	What Went Wrong	328
	What Went Right	329
13	Final Word	<b>331</b>
	The End of the Beginning	332
	Where to Go Next	332
	Books	332

Web Sites	333
Thanks To You, the Reader	333
Appendix About the CD-ROM	335
Index	339

Level design is the data entry and layout portion of the game development cycle. A level is, for all intents and purposes, the same as a mission, stage, map or other venue of player interaction. As a level designer, you are chiefly responsible for the gameplay. This article will give you insight into developing good levels for any type of game, whether they are military
