Saving Water To Manage Stormwater Sustainably, Understand Your Site. By Falon Mihalic. Rain gardens have recently gained popularity in Japan for the management of urban storm runoff. However, due to limited expertise regarding the technical capacity of such facilities, the level of their optimality in urban development remains unclear. To help elucidate rain garden capacity, research on two such facilities (referred to here as RG1 and RG2) was conducted in Kyoto, Japan, to clarify the characteristics of their storage/infiltration function.
