On the occasion of Black History Month, I've selected the most influential books on race and the black experience published in the United States for each decade of the nation's existence a history of race through ideas, arranged chronologically on the shelf. (In many cases, I've added a complementary work, noted with an asterisk.) Each of these books was either published first in the United States or widely read by Americans. He called for physical assimilation: In a colder climate blackened skins would revert to their original white beauty; the woolly substance on black heads would become fine, straight hair again. His racist idea of the lighter and straighter the better still demeans after all these years. 1811-1820. The Souls of Black Folk. 1903. Chapter XIV. The Sorrow Songs. I walk through the churchyard To lay this body down; I know moon-rise, I know star-rise; I walk in the moonlight, I walk in the starlight; I lie in the grave and stretch out my arms, I go to judgment in the evening of the day, And my soul and thy soul shall meet that day, When I lay. Little of beauty has America given the world save the rude grandeur God himself stamped on her bosom; the human spirit in this new world has expressed itself in vigor and ingenuity rather than in beauty. And so by fateful chance the Negro folk-song the rhythmic cry of the slave stands to-day not simply as the sole American music, but as the most beautiful expression of human experience born this side the seas.

After the Civil War, the racist legacy of slavery persisted, spurring movements of resistance. In his 1903 book *Souls of Black Folk*, Du Bois spoke strongly against Washington's advocacy of industrial education, which he saw as too narrow and economically focused, and stressed the importance of higher education for African Americans. NAACP founded, 1909. Born in Jamaica, the black nationalist leader Marcus Garvey founded his Universal Negro Improvement Association (UNIA) there in 1914; two years later, he brought it to the United States. Garvey appealed to the racial pride of African Americans, exalting blackness as strong and beautiful.

Much of this diffuse, idiosyncratic study sketches American black women of distinction, from Sojourner Truth to Roberta Flack. But the book is shot through with annoying factual errors, inexplicable omissions (a chapter on black music with no mention of Motown?), skewed history ("White women don't have a history of 'paying dues' for their right to vote"), hard-core sexism (women make good blues singers because they are naturally masochistic and narcissistic), and sheer blindness (black men who beat up black women are really only hitting "at the system" though it is the women who go to the hospital).
