Trash to Cash: How Businesses Can Save Money and Increase Profits (New Directions in Anthropology; 1) Fran Berman

If your company wants to save money currently spent on waste hauling, disposal, and clean-up costs, while protecting the environment, this is the book for you. Let Trash to Cash serve as your implementation guide to an effective, on-going corporate paper recycling and waste reduction program.

Berman addresses the major issues and realities surrounding paper consumption and recycling. This prescriptive guide can show you how to achieve a financially successful program for your company. Fully illustrated, Trash to Cash contains practical and insightful case studies that demonstrate how successful programs have been created and kept alive at AT&T, McDonald's, Merrill Lynch and other role-model corporations. Learn how to be on target environmentally while saving your company thousands, even millions of dollars.

Discover how a minor change to a paper bag saved McDonald's \$2.6 million in 1994. See how Giordano Paper Recycling Corporation saved a company \$50/ton in waste hauling fees and earn an \$80/ton recycling payment instead.

We are in a crisis situation. Statistical evidence is everywhere and the message is loud and clear. Paper consumption, landfills, deforestation, lumber production, and population growth rates all have an impact. This book identifies specific techniques that work and shows how any large or medium sized organization can overcome obstacles to curbing consumption and to recycling. The detailed case examples demonstrate how various companies have overcome their crises and "closed the loop" by buying recycled products.

Lots of original ideas on how to make money quickly and easily to boost your finances. Save the Student is just one example of a successful website, started at university by Owen Burek in his first year, which has since grown into a full-time and sizable enterprise. Read Owen's step-by-step guide on how to start a website in 20 minutes. It's really one of the best assets you can have. The Clickworker.com concept is based on 'internet crowd-sourcing' where businesses advertise specific, scalable tasks they need completing quickly. And for us, it's an easy way to make fast cash from our couch. There are a variety of tasks, but most commonly they involve mindless data entry, web research or form filling. Don't let cash languish in rubbish accounts - make your money work for you instead. Give yourself a 25% pay rise. There's nowt more powerful than sorting out your own finances. Most people who try to save while in debt are simply throwing their money away. The amount you pay in interest to borrow is much more than you earn on your savings, so pay the debt off with savings and you're quids in. How much? Someone with £5,000 on a credit card and £5,000 saved is likely to be around £800 a year better off by paying off the debt with the savings. How do I do it? How much? This can be big money, as forumite fran-o found: "I put my dress on Preloved and had interest from someone who had tried it on in a bridal shop. She came to try on and bought it for £550. Very happy!"
