Miller, Kenneth D. Understanding Cancer: A Patient's Guide to Diagnosis,

Ovarian cancer is a disease in which cancer starts in the cells of the ovary. There are three types of ovarian tumors, each named for the tissue in which they are found: Epithelial cell tumors: These tumors form from cells that cover the surface of the ovary.Â Radiation may also be used after surgery for selected patients, based on the type of ovarian cancer that was detected and how extensive the cancer was at the time of surgery. The radiation techniques used to treat ovarian cancer may include precision external beam radiation, including intensity-modulated radiation therapy (IMRT) and stereotactic body radiation therapy (SBRT).
