Tegner, Mia Jean, 1947-2001

Mia Jean Tegner Papers, 1906- 2002

Physical Description: 35 mss; 1 legal mss; 1 shoe box

Description: The accession consists of subject and other files of biologist Mia Jean Tegner, including student notes during the 1970's when she studied at the Scripps Institution of Oceanography, and papers, SEM photographs and laboratory notebooks documenting the research undertaken for her 1974 doctoral dissertation, "Sea urchin sperm-egg interactions and the block against polyspermy: A scanning electron microscope and experimental study." The papers include subject files on urchins, a city contract for a study of a sewage spill, wetlands, and other subjects. The papers include correspondence, laboratory notebooks, and a file of papers and talks presented by Tegner and other files documenting Tegner's research on the San Diego kelp beds and marine ecology of the region.

American marine biologist and ecologist; Marine biology; Marine ecology—California; Kelp bed ecology—California; Scuba diving; Seashore biology
