Anthony Cave Brown. Here is the extraordinary tale of what the U.S. State Department once called "the most valuable commercial prize in the history of the planet," the vast oil reserves beneath the sands of the Arabian desert. Using Aramco files never before available to scholars or journalists, dozens of personal interviews, and U.S. and British government documents, Anthony Cave Brown recounts the unceasing diplomatic and corporate maneuvers aimed at obtaining this unimaginable wealth, an ongoing drama that involved such figures as the great warrior-king Ibn Saud, founder of the Sa... An interesting and well done history. I lived in Saudi as a kid while my dad worked for Aramco. This book unfolds the whole story of which we were tiny part, and provides a greater depth of knowledge about the whole reason we were there.  
Like see review. Mar 13, 2017 Bookflieger rated it it was amazing. Very good book, and it is good for anyone who wants to know about the kings (and ExxonMobil) of Saudi Arabia.

Everything about the story of the American interest in Arabian oil is big. Standard Oil (whose post-Antitrust Act components formed Aramco in 1947 in the largest corporate merger the world had seen) made trillions of dollars over its history, produced millions of barrels of oil daily by the late 1950s and, to a mind-boggling extent, successfully intervened in international politics to protect its interests. Brown's skill in relating the complex relations among the Saudi royal family, the secretive oil executives and the American and British governments is no less impressive. It's a great story well told. The only shortcoming is that Brown relies so heavily on Aramco documents that his history is skewed a little too much to the corporate side, relegating geopolitics to a secondary, though still vital, role. Anthony Cave Brown's *Oil, God, and Gold: The Story of Aramco and the Saudi King* provides a detailed report on the formation of the concession agreement and OPEC. In 1933, the Standard Oil Company of California (Socal), against stiff competition from the Iraq Petroleum Company, concluded an agreement with Saudi Arabia that permitted it to explore for, produce and export oil. The profit-sharing agreement of December 1950 was probably the major event between the granting of the original concession and the final transfer of ownership to the Saudi government in 1980. It not only enhanced the Saudis' income from Aramco, but also gave them an interest in the price at which the company sold its oil.
