

Bristol & Gloucestershire Archaeological Society

**An
Archaeological and Historical
Bibliography of Gloucester**

compiled by

Malcolm Atkin

revised & updated by

Alan Tyler

Section 1 Bibliography

1993 & 2011

© Malcolm Atkin & Alan Tyler

Introduction

This Bibliography has been produced as a resource for researchers into Gloucester's history and archaeology. It will hopefully make some of the lesser-known works more accessible, as well as the specialist contributions to larger volumes.

Format

The Bibliography falls into three main sections.

Section 1: Alphabetised listing of authors and works.

Section 2: Listing of works under selected topographic and thematic keywords.

Section 3: Bibliography in computerised format, with the ability to undertake individual, tailored, searches.

The Computer Disk

The disk contains the bibliographic data, prepared under the POPYRUS Bibliographic System. It is supplied complete with the POPYRUS RETRIEVER program, which allows further interrogation of the data.

Introduction to the 2011 revised edition

This edition follows a request, in the February 2011 Newsletter, from the B&GAS Gloucester Research Panel for a volunteer to update the Archaeological and Historical Bibliography of Gloucester compiled by Malcolm Atkin in 1993.

No version of the computer disk was available when work on this edition commenced so the following work derives from paper copies.

It was agreed to retain as much of Malcolm's work as possible unless there is a very good reason to the contrary. However, some changes have been made during the revision.

The Council for British Archaeology's standard list of abbreviated titles of current periodicals and series has been adopted in place of the abbreviations used in the 1993 edition.

The Keyword Index has been retained with a few more categories created. The principal change being that POST-MEDIEVAL is now roughly 1500-1700 with 18th, 19th and 20th CENTURY being added.

The bibliography, for the most part, only includes published works to the end of 2010 which means that archaeological grey literature that has been produced as a result of developer funded fieldwork, most of which has been undertaken since 1993, has not been included. [That may be found by referring to <http://www.oasis.ac.uk/england/>] Likewise, the references that are printed annually in TBGAS Archaeological Review have not been reproduced.

Bearing in mind that the bibliography contains both archaeological and historical titles, only those historical titles that refer directly to archaeological features, including buildings, have been added. Thus papers about individual abbots, bishops [and Robert Curthose] are included as they are linked to the Cathedral. Likewise histories of firms such as Moreland's and the Gloucester Railway Carriage & Wagon Company are included as the buildings to some extent still exist even if the companies are long gone.

British Lakes.Â The National Trust, which manages the site, organizes guided walks focused on the historical and natural features of the region. 3. Bath. Public Domain, Link. Well known from antiquity as a spa town, an identity which it retains to this day, Bath is home to some of the best preserved Roman baths anywhere in the world. Walking through the baths, some of which still have water in the pools fed by underground springs, visitors can easily imagine the luxuries enjoyed by those who have frequented these baths throughout the ages.
