### INTRODUCTION

***The new edition of this bestselling online genealogy guide shows how to efficiently pursue family history using the latest online resources.***

Fully updated throughout, this guided tour of online resources and communities will help anyone begin or continue a family history project. *Genealogy Online, Tenth Edition* shows how to use the latest proven research methods and tools.

Featuring new and expanded coverage of DNA genealogy, social networking, video, blogs, podcasts, software, and more, the new edition covers the wide array of ancestry-related networks, websites, and other online services, and explains how they all work. Case studies and real-life examples are included in this practical, up-to-date guide.

- Features a new chapter on DNA genealogy, and websites to learn about and pursue this resource
- Reviews newly redesigned sites such as FamilySearch (the Mormon genealogy site), Ancestry.com, and WikiTree
- Expanded coverage of library card indexes, PRSI, online databases, and library resources

- Compares genealogy software that syncs with websites

## **ABOUT THE AUTHOR**

**Elizabeth Powell Crowe (Navarre, FL)** has been pursuing genealogy for more than 20 years. Her previous editions of *Genealogy Online* have sold a combined total of nearly 200,000 copies. Crowe conducts genealogy workshops and has been a regular guest on the Dear MYRTLE Family History Internet Radio Show and other genealogy-related programs.

**\$ 75.00 AUD**

**\$ 80.00 NZD**

Edition: 1

Previous ISBN: 9780071748568

Subject: Computers - Certification Guides / General

Trim Height: 28 cm

Trim Width: 22 cm

Pages: 432

Format: Softcover

## INTRODUCTION

***Written by leading IT security educators, this fully updated lab manual supplements Principles of Computer Security, Fourth Edition***

Optimized for the school market, *Principles of Computer Security Lab Manual, Fourth Edition* contains more than 40 labs that challenge students to solve real-world computer networking and security problems with key concepts.

Organized around the four fundamental security questions students must be able to answer as information assurance professionals, this lab manual provides professors the labs and curriculum flexibility they need to meet students' educational needs. Clear, measurable lab objectives map to several key industry computer security standards and core certifications, ensuring clear correspondence to *Principles of Computer Security, Fourth Edition*.

- Includes materials lists, lab set-up instructions, post-lab observation questions, and Key Terms Quiz
- Downloadable Virtual Machines included with the Online Learning Center allow students to practice securing and defending a network in a Linux, Windows, or Macintosh virtual

- environment
- Solutions available on the textbook OLC

This book is intended for students enrolled in an instructor-led course and does not provide correct answers for the end-of-chapter quizzes or access to the instructor's resource materials. If you are an instructor, please contact your McGraw-Hill Education sales representative for details.

## **ABOUT THE AUTHOR**

**Vincent Nestler, CompTIA Security+ (San Bernadino, CA)**, visiting professor of network security at California State University, San Bernadino, is an instructional design expert with 10 years of experience developing security-related labs.

**Keith Harrison, Ph.D. (San Antonio, TX)**, is the lead developer of the Collegiate Cyber Defense Competition (CCDC) Scoring Engine, and the CyberPatriot Competition System (CCS) Scoring Engine.

**Matthew Hirsch (New York, NY)** has worked in the information security operations group for a large financial firm, data distribution for Deutsche Bank and Sanwa Securities, and systems / network administration for Market Arts Software.

**Wm. Arthur Conklin, Ph.D., CompTIA Security+, CISSP (Houston, TX)** is an assistant professor in the Information and Logistics Technology Department at the University of Houston.

## **ABOUT THE AUTHOR**

**Kathy Sierra** was a co-developer of the SCJP exam and the SCEA exam. She was also a master trainer for Sun Educational Services, where she taught Java instructors. Kathy's full-time job since 1998 has been to help others learn Java and prepare for the SCJP exam, and she also is also the sole founder of the world's largest Java certification web site, Javaranch.com. Kathy has worked for Sun Educational Services worldwide headquarters in the course development, customer training, and certification departments.

**Bert Bates** is a Sun Certified Programmer for Java and has been developing software for the last 20 years. He has participated in the development of the SCJP, SCEA, and SCWCD exams. He has also been teaching software development, including Java programming, for many years, with a particular interest and background in artificial intelligence.

Welcome to Genealogy Online. The Genealogy Unit of the Cook County Clerk's Bureau of Vital Records provides NON-CERTIFIED versions of birth, death and marriage records for the purpose of genealogical research. Records found on this site are for Chicago and Cook County dating back to 1872. To improve our customer satisfaction, the Cook County Clerk's Office is offering a new version of the Genealogy Online website.
