Particular physical design programs are: 1. Crime Prevention Through Environmental Design (CPTED) 2. Situational Crime Prevention (can also be used to address the broader crime situation). Strategy types used in physical design programs. 1. Mechanical - capital or hardware-intensive security - e.g. locks, CCTV, lighting. 2. Organised - labour-intensive security - e.g. guards, police, security patrols.Â involves design of physical space in the context of the: - needs of bona fide users of space (physical, social and psychological needs) - normal and expected (or intended) use of space (the activity or absence of activity planned for the space) - normal predictable behaviour of both bona fide users and offenders.
