On the Shores of the Unknown **A Short History of the Universe**

In this fascinating book, astronomer Joseph Silk explores the universe from its beginnings to its ultimate fate. He shows how cosmologists study cosmic fossils and relics from the distant past to construct theories of the birth, evolution, and future of the universe. Stars, galaxies, dark matter, and dark energy are described, as successive chapters detail the evolution of the universe from a fraction of a microsecond after the Big Bang. Silk describes how physicists apply theories of subatomic particles to recreate the first moments of the Big Bang, and how astronomers chart the vast depths of space to glimpse how the most distant galaxies formed. He describes the search for dark matter and the dark energy that will determine the ultimate fate of the universe. This highly readable account will appeal to all those with an interest in the story of the universe.

JOSEPH SILK is the Savilian Professor of Astronomy and member of the Astrophysics Department at the University of Oxford. His research interests are in theoretical cosmology, seeking insights about dark matter, galaxy formation, and the cosmic microwave background. He has authored or co-authored a number of popular articles and books including *A Short History of the Universe* (1997) and *The Big Bang* (3rd edition, 2000).

Contents

Prologue	<i>page</i> 1
1 Building blocks of the cosmos	5
1.1 Cosmological principles	5
1.2 Orders of magnitude	9
1.3 Building blocks of the universe	11
1.4 The galaxies	22
1.5 The darkness of the night sky	24
2 Expansion of the universe	26
2.1 The Doppler shift	26
2.2 The distance to the nearest stars	28
2.3 The redshift–distance relation	31
2.4 Unlocking the extragalactic distance scale	33
2.5 What is the Hubble constant?	39
2.6 Steady state cosmology	41
3 Cosmic microwave background	47
3.1 The discovery	48
3.2 Blackbody radiation	50
3.3 The isotropy of the cosmic microwave background	52
3.4 The epoch of thermalisation	53
3.5 The last scattering epoch	54
3.6 Fluctuations	56
4 The first 10^{-43} second of the universe	59
4.1 Singularities	59
4.2 The quantum vacuum	61
4.3 Fundamental forces	64

vi CONTENTS

4.4	Pair creation	66
4.5	Particles and waves	67
4.6	Mini-black holes	69
4.7	The Planck scale	70
4.8	Grand unification	72
4.9	Higher dimensions	73
4.10	Symmetry breaking and inflation	75
4.11	Why is the universe so uniform?	80
4.12	The flatness problem	82
4.13	Anthropic issues	82
5	Genesis of baryons and helium	85
5.1	The matter–antimatter puzzle	86
5.2	Generation of the baryon number	89
5.3	Proton decay experiments	91
5.4	The weak interaction freeze-out	92
5.5	Primordial nucleosynthesis	93
5.6	Helium synthesis	95
6	Testing the Big Bang	97
6.1	The density of the universe	97
6.2	Curved space and general relativity	102
6.3	Cosmological tests	106
6.4	Impediments to the tests	110
7	Dark matter	113
7.1	Local indicators of dark matter	114
7.2	Luminous regions of galaxies	115
7.3	Galaxy halos	117
7.4	Galaxy groups, clusters, and superclusters	118
7.5	Large-scale flows and dark matter	118
7.6	A universe at the critical density?	120
7.7	Deuterium and the baryon density	122
7.8	The lithium puzzle	124

7.9	WIMPs: exotic particle dark matter	125
7.10	Dark energy	129
8	Baryonic dark matter	132
8.1	Life after the main sequence: white dwarfs	133
8.2	The formation of a neutron star	135
8.3	Observing neutron stars	137
8.4	Brown dwarfs	139
8.5	Black holes	140
8.6	Are halos baryonic?	152
8.7	MACHOs: astrophysical dark matter?	154
9	Intergalactic matter	158
9.1	Recombination and decoupling	158
9.2	The search for the intergalactic medium	159
9.3	Intergalactic clouds	161
9.4	Intracluster gas	164
9.5	Dark baryons	165
10	Origin of structure	170
10.1	Small fluctuations	170
10.2	Cold dark matter and bottom-up formation	172
10.3	A radical view: from cosmic pancakes and filaments to galaxies	176
10.4	Origin of the fluctuations	181
10.5	A low density universe?	184
10.6	Detection of temperature fluctuations	187
10.7	The whispers of creation	190
11	Large-scale structure	193
11.1	The greatest structures: galaxy clusters	193
11.2	Voids and sheets	196
11.3	Large-scale flows revisited	198
11.4	The challenges of cold dark matter	202

Shores Unknown was nominated for five awards and won the prize for best UE4 game! And that concludes the update. As always, if you like what you see, please consider wishlisting the game on Steam. We also post regular bite-sized updates on our Twitter and Facebook[www.facebook.com] pages, so if one of those is your thing, please feel free to follow us there as well! Remember, your support is very important for us! Shores Unknown. 1. Now, onward to the actual update! At the moment, we're simultaneously working on story chapters 2 & 3 (out of 4 planned) of the game while also polishing the gameplay. Is it a ghost ship? Trust us when we say its ballista bolts feel material enough. June, in particular, was heavy on visual upgrades, the first one being our water material. What dangers await you on Shores Unknown? Reseñas generales: No existen reseñas de usuarios. And speaking of bears: our more immediate goal is to get a playable demo of Shores on Steam, so you all will soon be able to test your mettle against the might of the bear yourselves. If you can find the bear, that is! In the meantime, check out this great Let's Play of the demo build by Nookrium! <https://youtu.be/vbwRszjAAw4> in which, Nookrium does not find the bear. But you might. If you have any questions about Shores or the team developing working on it, we're always here to answer - so don't be shy. Stay tuned for more updates! Cheers, - Ilya / Vallynne team lead. 1 coment Shores Unknown. 250 likes · 65 talking about this.
